Ipiproteins from membranes...
In word In Biol. 2:212-218(2000).
In FUNCTION: Part of an ATP-dependent transport system responsible for the release of lipporceins targeted to the outer membrane for the inner membrane. Such a release is dependent of the sorting-signal (absence of an Asp at position 2 of the mature lipporcein) and of lola.
Ilpoprotein and of lola.
SUBCELLULAR LOCATION: Inner membrane-associated.
Is SINGLARITY: Belongs to the ABC transporter family. Lold subfamily.
